

Multimodal Test Document — Page 1

This document is designed as a simple three page multimodal validation artifact. It contains ordinary readable text so that a model can confirm page structure and extract information reliably.

The Secret Is On Page 2

This page intentionally includes the verification sentence. The unique passphrase for verification is TROPICAL_BANANA_2026. The rest of this paragraph is generic context for document understanding tests.

Conclusion

This final page closes the sample document with a generic conclusion. No additional secret passphrase is introduced here, and the document should be treated as a controlled test fixture.
